Dear Sir or Madame:

As part of our business activities we recently acquired several toxicology reports from ExxonMobil Corporation relating to Ethoxyethanol-t-butylamine, often referred to by ExxonMobil's trade name FLEXSORB® SE (CAS# 87787-67-5).

2003 AUG 28 AM 9:53

OPT NCIC

In reviewing these reports, which were issued in Europe in 1992, we conclude that some of them contain data that the EPA would consider reportable under the requirements of TSCA Section 8(e). We cannot confirm that these data were reported to the EPA by ExxonMobil at the time they were generated or later under EPA's 8(e) Amnesty Program. We also cannot confirm whether the data, if reported, were submitted under identity confidential claims.

In order to alleviate double reporting and thereby burden the Agency with information it already has, please let us know promptly whether 8(e) notification on this chemical have been submitted by ExxonMobil, its predecessor company, Exxon or Exxon Chemical Company, Nalco Exxon or by any other manufacturer who might have acquired toxicity data on CAS# 87787-67-5 under circumstances similar to Nova Molecular Technologies, Inc.'s acquisition.

You may contact either myself or Trisha Mauritz via phone: 608-754-6682 or fax: 608-754-6878 if you have any questions or require further clarification.

Very truly yours,

J. Michael Clumpner
Director
